

## Burnbrae Farms Facilities

Working together for over 20 years, Ernst Hansch Construction Ltd. (Hansch) has completed a number of projects for Burnbrae Farms Limited (Burnbrae) at their Winnipeg locations. One of these projects was an egg processing Clean Room at Burnbrae Farm's Wellington Avenue location and construction of a concrete foundation, built to support two 6,000 gallon silos for the storage of processed eggs.

Applying value engineering, Hansch completed the work in accordance with CFIA standards while providing cost effective solutions to meet Burnbrae's budget. Construction included

specialized approved products and techniques such as Stonehard epoxy flooring and a Zeroloc insulated metal panel wall system. A HEPA filtered HVAC system was also installed to meet the required air quality.

Hansch has also completed multiple interior renovations and provided design and construction services for the interconnection of two adjacent buildings, cooler and cooler / freezer storage room projects at Burnbrae's Pandora Avenue, Kernaghan Avenue and Wellington Avenue locations.
