

## Grace Hospital North Lot Development

Ernst Hansch Construction was awarded the contract to complete the North Lot Development project for the Winnipeg Regional Health Authority at the Grace Hospital.

Construction of a new glazed aluminum entry vestibule provided staff a new entrance into the hospital.

Works included a large, new staff parking lot on the north side of the Grace Hospital. Large trees were

removed and a new land drainage system was installed. Construction of the new asphalt parking lot was complete with parking fencing, powered stalls and automatic parking lot access and egress barriers.

Completion of this project included a large patio area and well presented landscaping through out.
