

Kenora Bridge Rehabilitation

Ernst Hansch Construction Ltd. was awarded the Canadian Pacific Railway contract for the rehabilitation of CPR Bridge Mileage .07 Keewatin Subdivision over the Winnipeg River, East Branch in Kenora, ON.

Works included the installation of reinforcing steel and preparation

of the masonry surface prior to the installation of reinforced concrete pier jackets, as well as miscellaneous steel work and grouting, beneath an active CPR main line, while working to ensure protection of the fish habitat throughout the project.
