

PTH 59 & 100 Overpass Rehabilitation

Ernst Hansch Construction was the successful bidder for the Manitoba Infrastructure contract to rehabilitate the concrete girder soffits on the PTH 59 & 100 overpass structure.

Works included lifting girders 12" above the pier caps, hydro-demolition of girder soffits, installation of a galvanic protection system and cast

in place high strength concrete.

This project was successfully completed with work on the site coordinated so roadways both below and above the overpass remained open to traffic during construction.
