

## Price Industries Salvagnini Expansion

Price Industries (Price) is a global leader in designing and manufacturing heating ventilation and air conditioning (HVAC) equipment. Price required more space for new specialized equipment in its Winnipeg manufacturing facility. Ernst Hansch Construction (Hansch) provided design-build services to Price for the Salvagnini Expansion.

Hansch designed and constructed a new 11,000 square foot steel framed building addition to match the existing building's façade. The extreme weight of the new manufacturing equipment

within the addition required a heavy duty engineered foundation. The alignment of the equipment was critical with almost zero tolerances. Hansch engineered and installed a new thickened structural concrete slab bearing on thirty (30) concrete piles, installed to a depth of 62 feet.

The project was completed on time and the new equipment was installed successfully, allowing Price to expand its manufacturing operations on time.

<b>Client</b>	Prince Industries Limited
<b>Location</b>	638 Raleigh Street, Winnipeg, Manitoba
<b>Size</b>	11,000 square feet
<b>Completed</b>	January 2018
<b>Project Type</b>	Industrial - Manufacturing
<b>Services</b>	Design-Build
