

## The Edge Lounge & Nightclub Renovation

The owner of the Edge Lounge and Nightclub located at the Frantz Inn near Steinbach, Manitoba wanted to renovate the interior of the space to provide a new atmosphere and improve functionality of the space.

Through collaboration with the owner and interior designer, Ernst Hansch Construction provided value engineering to tailor the design and deliver construction techniques that

provided the best value and reduce the overall cost of the work while meeting the intent. Remaining open during construction and with only two weeks lead time, this 3,400 square foot interior renovation was completed within the original 7 week schedule including all high end finishes and installation of the first GlasTender modular bar system in Canada.
