

## North End Water Pollution Control Centre

As the successful bidder, Ernst Hansch Construction Ltd. was awarded the City of Winnipeg contract for the North End Water Pollution Control Centre Phosphorus Removal Facility located at 2230 Main Street in Winnipeg, MB.

Project works included the construction of a railcar off loading structure as well as the track relocation and a chemical storage tank addition to an existing building. The work also included the mechanical injection system to various plant process lines, electronic controls and monitoring systems.
